THE **ERHARDT BS** WITH CHAIN

QUALITY AND PRECISION FOR THE INDIVIDUAL, SPECIAL AWNING

An awning that is to remain functional and beautiful for many years places high demands on design and implementation. Thanks to advanced technology, the use of high-quality materials and careful manufacture, the BS chain arm awning lives up to these demands completely. Components made from extruded aluminium, chromated and powder-coated, and all nuts and bolts in V2A rustless steel quality make the BS extremely durable and weather-resistant. The options for adding useful accessories makes them individually adaptable.

FOLDING ARMS FOR HEAVY LOADING

A robust mechanism in the arm middle joint with special stainless steel flyer chain guarantees stability and extreme strength.

UNINTERRUPTED AWNINGS

By using drop-forged arm forks and middle hinges in conjunction with reinforced arm sections, this awning is stable enough for maximum fabric tension. The arm sections are pivoted by a high-quality stainless steel chain. The ERHARDT BS can be extended up to 7.0 m wide and 4.0 m long.

THE AWNING IN AN AWNING

The ERHARDT BS can also be supplied with a double awning upon request. A second awning cloth provides optimum protection from the low-standing sun, from the wind and from prying eyes.

THE ADVANTAGE: SOLTIS FABRIC – YOU CAN SEE OUT; OTHERS CAN'T SEE IN

MOUNTING FOR ANY SITUATION

The BS folding arm awning can be fixed without problem to the wall, under overhanging roofs and balconies or on the rafters.

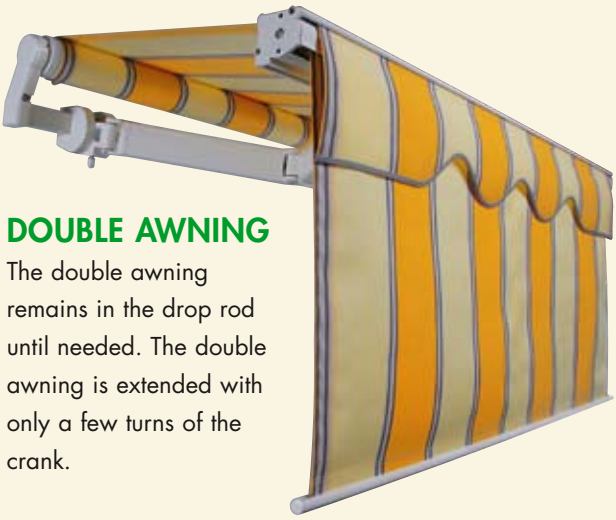
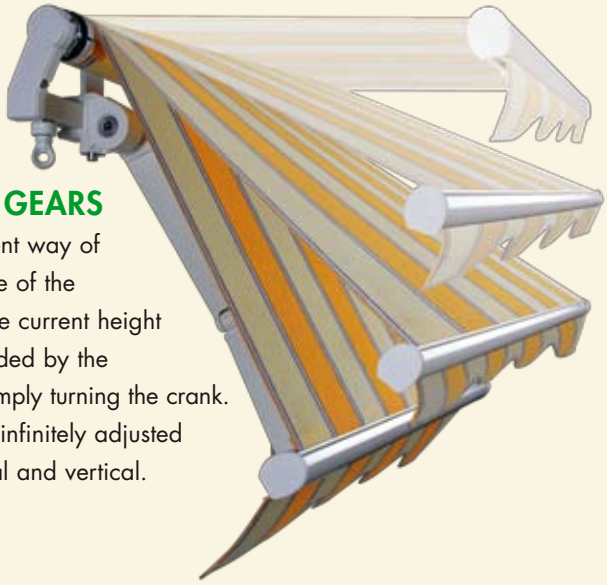
ARM – TOP QUALITY AND ECONOMY



DOUBLE AWNING

The double awning remains in the drop rod until needed. The double awning is extended with only a few turns of the crank.



VARIOMATIC GEARS

The most convenient way of adapting the angle of the ERHARDT BS to the current height of the sun is provided by the 'Variomatic', by simply turning the crank. The angle can be infinitely adjusted between horizontal and vertical.

Without rain cover

With rain cover

If the ERHARDT BS is equipped with the optional, elegant protective cover of extruded aluminium, the awning is protected in any weather.

ERHARDT awnings put the rest in the shade

... with proven quality and perfection
... thanks to high-quality execution of material and design
... with classical and modern fabrics
... and a large selection of

■ **Cassette awnings** ■ **Tube awnings** ■ **Semi-cassette awnings** ■ **Folding arm awnings**
■ **Gastronomy folding arm awnings** ■ **Conservatory awnings** ■ **Basket awnings** ■ **Drop arm awnings**
■ **Vertical awnings** ■ **Window awning blinds** ■ **Replacement fabric and valances** ■ **Balcony canopies**
■ **Winter protection sleeves for folding arm awnings** ■ **Patio roofs** ■ **Side protection**

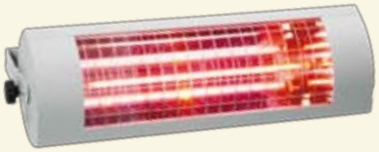
The advantage: UV protection

UV light, in particular UVB radiation, is harmful to humans. This radiation can be neither seen nor felt. Only the impacts of excessive UV radiation can be noticed: sunburn and, as the extreme consequence of this, skin cancer. Our awning fabrics provide the necessary protection. At least 95% of the hazardous UV radiation is blocked, depending on the colour of the awning.

Convenient accessories for all ERHARDT AWNINGS:

Wireless hand transmitter for really simple awning control

Wind and sun sensor, protection and security for your awning



Solar heat from the plug socket. Patio heating using modern infrared technology

Light engine, dimmable for a pleasant atmosphere on your patio or balcony

geprüfte Qualität CE EN 13561 Klasse II

Expert advice, exact measuring, prompt delivery and installation – even during the season – mean that you will very quickly live happily ever after with your Erhardt awning.
